- Introduction
- Problem and Objectives
- Discovering tag semantics
 - State of the Art
 - Proposed approach
 - Multilingual Sense Repository
 - Sem4Tags
- PhD progress and future work.

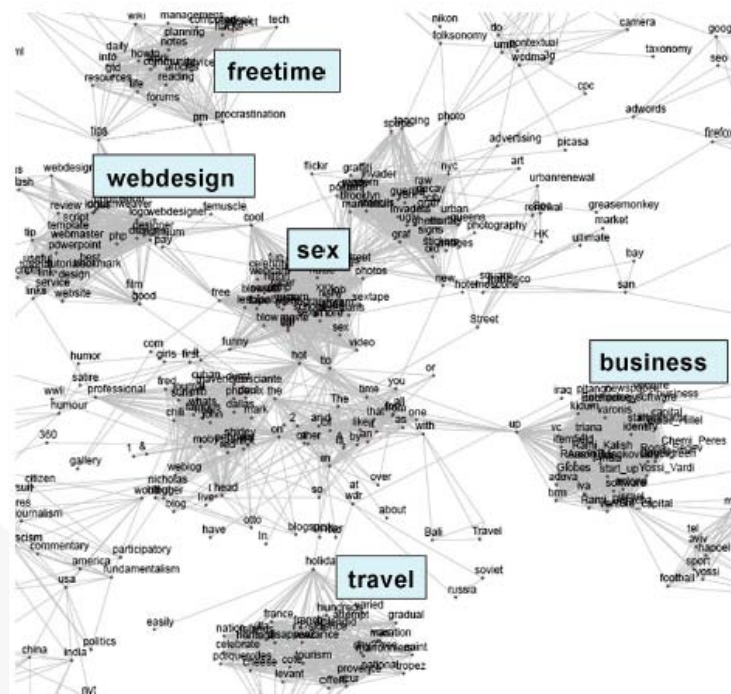

- **Social Tagging Systems**

- Web 2.0 applications
- Applications for storing, sharing, and discovering information resources.
- Users assign *tags* in multiple languages to identify information resources
- *Tags* are used to search/discover resources

- **Folksonomy**

- Emerging classification scheme from social tagging systems
- Folk: People, Taxonomy: Classification
- Represented by: **Users, Tags, Resources**
- Two **Tags** are related if:
 - They co-occur when annotating a **resource**
 - They co-occur when a **user** use them

• Folksonomies & Ontologies

- We can use folksonomy information to create ontologies or to add knowledge to existing ontologies.
 - New classes and relations
 - New instances

Folksonomy

Ontology

Advantages

- Knowledge generated by the masses
- Are low cost:
 - » Users are keen to assign tags
 - » Low cognitive burdens
- Evolve fast:
 - » new vocabulary is continuously added by users
- Vocabulary tends to converge

Drawbacks

- No fixed vocabulary
- Lack of semantics associated with tags
 - Ambiguous tags
 - Relations among tags are not defined (sameAs, broader-narrower, subclassOf, typeOf)
- Multilingual Tags

- **Problem:** How to take advantage of multilingual folksonomy information to build ontologies, and to enrich, and populate existing domain ontologies.
 - **Discover tag semantics in multilingual folksonomies**
 - How to use tag semantics to build ontologies, and to add knowledge to existing folksonomies.
- **Objectives:**
 - Methods and techniques to:
 - Extract knowledge from multilingual folksonomies
 - Use that knowledge to build new ontologies, and to add new classes, relations and instances to existing domain ontologies.
 - Software to implement the proposed methods and techniques.

State of the Art: Discovering tag semantics in folksonomies

Approach	Type	Auto	Data Source	Data Selection & Cleaning	Context Identification	Disambiguation	Semantic Identification
Mika, 2007	Clu	Yes	Delicious, other	Yes	Yes	No	Yes
Hamasaki <i>et al.</i> , 2007	Clu	Yes	Polyphonet	No	Yes	Yes	No [±]
Giannakidou <i>et al.</i> , 2008	Hyb	Yes	Flickr	Yes	Yes	Yes	No [±]
Jäschke <i>et al.</i> , 2008	Clu	Yes	Delicious, BibSonomy, Other,	Yes	Yes	No	No [±]
Specia & Motta., 2007	Hyb	Semi	Delicious, Flickr	Yes	Yes	Yes	Yes
Angeletou <i>et al.</i> , 2008	Ont	Yes	Flickr	Yes	Yes	Yes	Yes ⁺
Cantador <i>et al.</i> , 2008	Ont	Yes	Union of Flickr and Delicious	Yes	Yes	No	Yes ⁺
Tesconi <i>et al.</i> , 2008	Ont	Yes	Delicious	Yes	Yes	Yes	Yes ⁺
Passant, 2007	Ont	No	Enterprise Folksonomy	Yes	Yes	Yes	Yes ⁺
Maala. <i>et al.</i> , 2007	Ont	Yes	Flickr	Yes	Yes	No	Yes

DBpedia

None of the analyzed approaches deals with multilingual tags

Discovering tag semantics in multilingual folksonomies

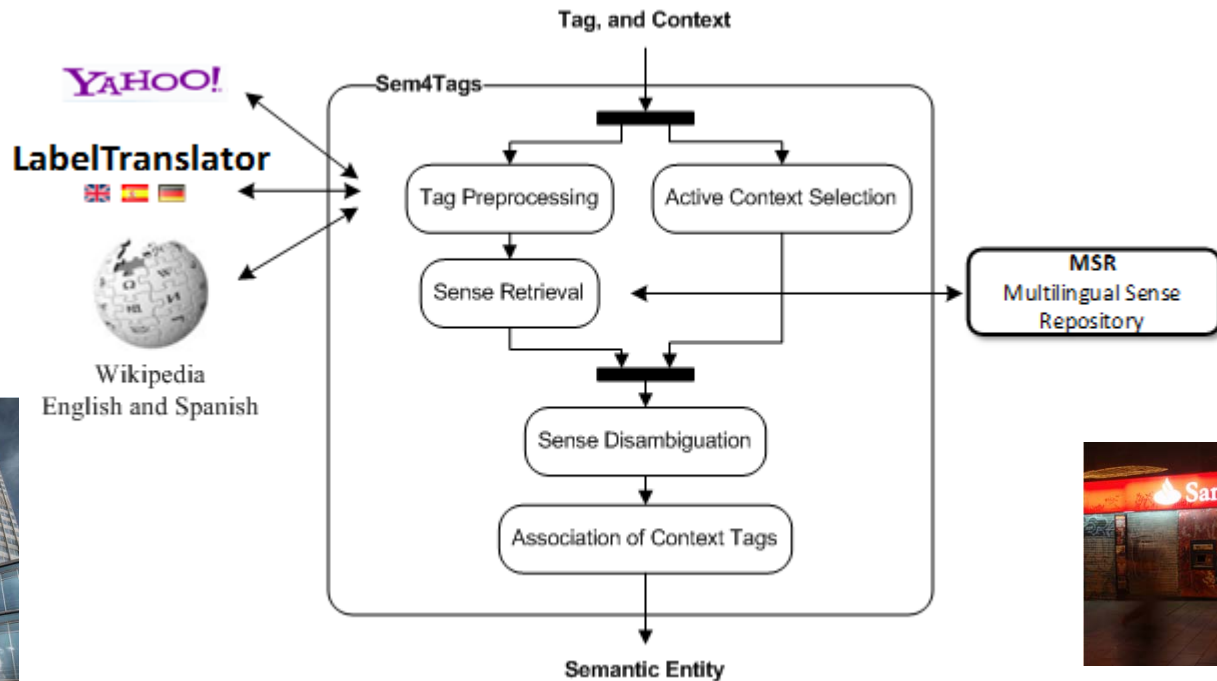

- **MSR**: a Multilingual Sense Repository based on Wikipedia and enriched with semantic information taken from DBpedia.

Banco	Banco	Terminos y frecuencia	Bank	http://dbpedia.org/resource/Bank
	Cardumen	Terminos y frecuencia	Swarm	http://dbpedia.org/resource/Swarm
	Banco de Arena	Terminos y frecuencia	Sandbank	http://dbpedia.org/resource/SandBank

Discovering tag semantics in multilingual folksonomies

- **Sem4Tags**: A process for Associating of Semantics to Tags.

- First Year
 - Paper accepted in the Knowledge Engineering Review.
 - State of the Art: Discovering and Associating Semantics to Tags in Folksonomies
 - Research visit to the IAM group of Southampton University
 - Paper accepted in the Workshop CKCaR'09 (Collective Knowledge Capturing and Representation)
 - Preliminary Results in tag Disambiguation using DBpedia.
- Second Year
 - Paper sent to the *EKAU-2010*
 - Associating Semantics to Multilingual Tags in Folksonomies.
 - Send a paper to the *ISWC-2010* (end of Jun)
 - Research visit (*Jul-Dec*)
 - Send a paper to the *Artificial Intelligence Journal*, Special Issue on "Artificial Intelligence, Wikipedia and Semi-Structured Resources" (end of Oct)
 - Send a paper to a workshop describing the proposed process for ontology building, enrichment & population from folksonomy information

- Third Year
 - Send a paper to a conference describing the evaluation of the proposed approach for ontology building, enrichment and population from folksonomy information.
 - Write PhD Thesis
 - Research Visit
