Title of the New

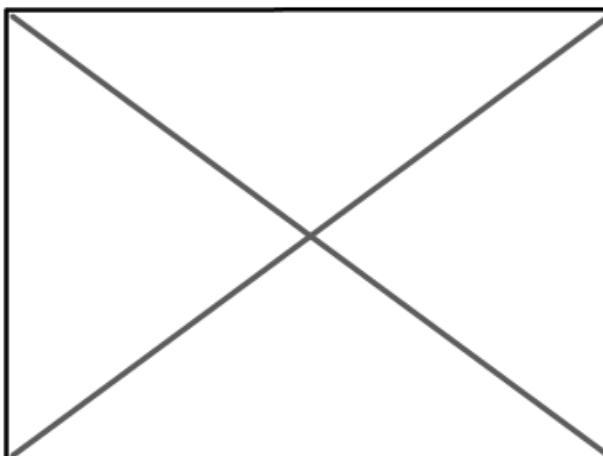

March 4th 2019 - 11:07

the first time in the history of the world that the people of the United States have been compelled to go to war with their own government.

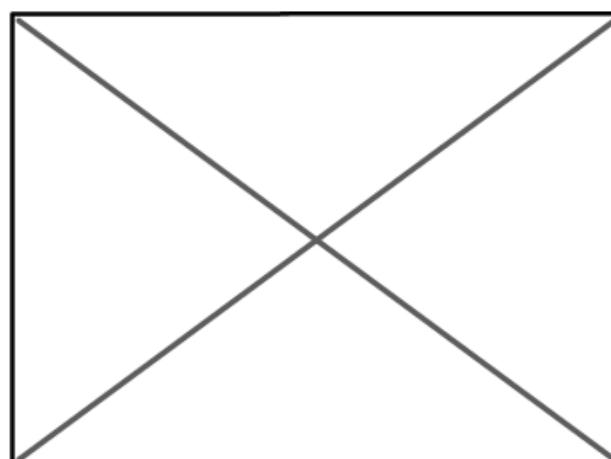

Title of the New

March 4th 2019 - 11:07

Title of the New

March 4th 2019 - 11:07

и вспомнил о том, что вчера в магазине купил пакет соли и решил, что это
лучше, чем соль из колодца. И тут же начал солить картошку. Солил он
картошку необычно: солил с двух сторон, то есть сначала солил
одну сторону, а потом переворачивал картошку и солил другую. Так
сделав это с каждой из четырех картошек, он решил, что картошку
можно солить и с трех сторон, то есть сначала солил одну сторону,
а потом переворачивал картошку и солил другую, и третью. Так
сделав это с каждой из четырех картошек, он решил, что картошку
можно солить и с четырех сторон, то есть сначала солил одну сторону,
а потом переворачивал картошку и солил другую, и третью, и четвертую.
Таким образом, он решил, что картошку можно солить с любой стороны
и решил, что это очень удобно.

Asunción Gómez-Pérez, Ada Byron award to technologist woman 2015

Share on Twitter

Asunción Gómez-Pérez has been awarded with Ada Byron award to technologist woman 2015 awarded by the Faculty of Engineering at Deusto University. The award seeks to highlight the work of professionals in the technology sector that quietly and increasingly are providing significant progress in many areas. The name of the award is a tribute to Ada Byron (Ada Lovelace), one of the most important in the history of engineering, recognized as the first computer programmer women. The aim is to give visibility to real women (often unnoticed by the media) to serve as models and encouragement for girls and young people today.

The award aims to:

Give visibility to women within the world of technology recognizing their important work, insufficiently known in the whole society.

Enriching society with technology dissemination events, providing female models to the younger generation.

Promoting technological vocations approaching technological work the adolescents, highlighting the positive aspects, especially in female vocations.

Socially visible the importance of technology for economic growth and as future value to society.

Ontology Engineering Group

El Grupo de Ingeniería Ontológica, fundado en 1995, se encuentra actualmente en el 9º posición en el ranking de grupos de la UPN (más de 200 grupos). El grupo tiene vocación internacional, con miembros procedentes de países europeos, latinoamericanos y asiáticos; y multidisciplinar con formación en Informática, Lingüística y Biología, entre otros.

Equipo

- Directores
- Asunción Gómez-Pérez
- Oscar Corcho

Lineas

- Proyectos
- 30+ europeos, 50+ nacionales,
- 30+ contratos privados
- Publicaciones
- 100+ revistas, 350+ conferencias internacionales/captativas, 7 libros

CAMPUS
DE EXCELENCIA
INTERNACIONAL

Comunidad

- Estandarización
- 20+ W3C, ISO, UAIIS, PERNUK
- Eventos: +100 eventos de verano en ontología y web semántica, 50+ talleres/tutoriales
- Seminarios
- Difusión regular
- Redes sociales de datos abiertos y ciudades inteligentes

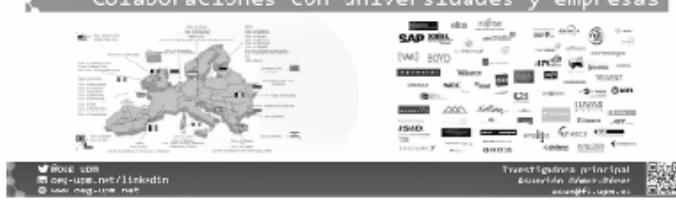

Ingeniería ontológica

- Metodología NeOn
- Ontologías publicadas
- Sensores, geografía, provenance, metadatos, m-Google, etc.
- Evaluación de ontologías
- Documentación: Widoco

Datos abiertos y enlazados

Colaboraciones con universidades y empresas

Why join UPM@OEG

UPM is the largest Spanish technological university as well as a renowned European institution. With two recognitions as Campus of International Excellence, it is outstanding in its research activity together with its training of highly-qualified professionals, competitive at an international level. More than 2,400 researchers carry out their activity at the UPM, grouped in 216 Research Groups, 10 Research Centres and 55 Laboratories, all of them committed to transforming the knowledge generated into advances applied to the production sector.

If you would like to join our team, do not hesitate to [contact us](#).

и сказала я ему, что я не могу пойти в кино, потому что у меня нет денег. Он сказал, что это не проблема, и предложил мне купить билеты. Я согласился, и мы вместе пошли в кино. Мы смотрели фильм о любви и романтике, который очень понравился мне. После фильма мы пошли на обед в ресторанчик, где я мог выпить кофе и пирожное. Мы провели отличный вечер, и я был очень рад, что смог провести его с моим другом.

JULIA BOSQUE GIL

PhD Student

Bio

Julia Bosque Gil is a PhD student at the Ontology Engineering Group (OEG) of the Polytechnic University of Madrid (UPM). She obtained her MSc in Computer Science from UPM in 2010. Her research interests include semantic web technologies, specifically in the areas of linked data and knowledge graphs. She has contributed to several projects related to the semantic web and has published papers in international conferences and journals. She is currently working on a thesis that explores the application of semantic web technologies to real-world problems.

Projects

Julia Bosque Gil is involved in several research projects. These include the development of semantic web applications for environmental monitoring and healthcare. She has also contributed to projects related to the integration of multiple ontologies for complex domain modeling. Her work has been published in various academic journals and presented at international conferences.

Researchers

Oscar Corcho

Esteban González Guardia

Vicky de Pablo Llorente

Description

STARS4ALL is a research project funded by the European Commission under the FP7 program. The project aims to develop a semantic framework for the management of astronomical data, specifically for the analysis of variable stars. The project involves researchers from several institutions, including the University of Valencia, the University of Zaragoza, and the University of Murcia. The project is led by Oscar Corcho and Esteban González Guardia, and it is coordinated by Vicky de Pablo Llorente.

Publications

STARS4ALL has published several papers in international journals and conferences. Some of the most recent publications include:

- "A Semantic Framework for the Management of Astronomical Data" (Corcho et al., 2012)
- "A Semantic Web-based System for the Analysis of Variable Stars" (González et al., 2013)
- "A Semantic Framework for the Analysis of Astronomical Data" (Corcho et al., 2014)

A Semantic-Based Approach to Attain Reproducibility of Computational Environments in Scientific Work ows: A Case Study

[Link to the publication](#) [Share on Twitter](#) [Download in PDF](#) [Bitbex Reference](#)

Title A Semantic-Based Approach to Attain Reproducibility of Computational Environments in Scientific Work ows: A Case Study

Authors [Santana-Perez, I](#)
[Ferreira da Silva, R](#)
[Rynge, M](#)
[Deelman, E](#)
[Pérez-Hernández, M](#)
[Corcho, Oscar](#)

Type Presentation at Congress or Conference

Abstract Reproducible research in scientific work ows is often addressed by tracking the provenance of the produced results. While this approach allows inspecting intermediate and nal results, improves understanding, and permits replaying a work ow execution, it does not ensure that the computational environment is available for subsequent executions to reproduce the experiment. In this work, we propose describing the resources involved in the execution of an experiment using a set of semantic vocabularies, so as to conserve the computational environment. We dene a process for documenting the work ow application, management system, and their dependencies based on 4 domain ontologies. We then conduct an experimental evaluation sing a real work ow application on an academic and a public Cloud platform. Results show that our approach can reproduce an equivalent execution environment of a predened virtual machine image on both computing platforms.

Ontologies

On the Semantic Web, ontologies define the concepts and relationships used to describe a given domain and annotate data about it.

More about our Ontologies: <http://smartcity.linkeddata.es/>

Advanced Search

Buscamedia Ontologies: M3

The aim of the M3 ontology network is to represent the knowledge related to multimedia information of any type of resource (text, video, audio, audiovisual or image) in several domains and taking into account a multilingual context.

[Read More](#)

FP Research project ontologies

In the research projects of the European Commission's Framework Programme, a set of ontologies have been using for modelling the information. The set of ontologies are: Documentation Ontology, Event Ontology, Organization Ontology, Person Ontology and Project Ontology. These ontologies have been used in different FP6 and FP7 projects, such as NeOn (FP6), SemSorGrid4Env (FP6), SEALS (FP7), etc.

[Read More](#)

hydrOntology: a global ontology of the hydrographical domain

hydrOntology (Vilches-Blázquez et al., 2009) is an ontology in OWL that follows a top-down development approach. Its main goal is to harmonize heterogeneous information sources coming from several cartographic agencies and other international resources.
